INDEX TO VOLUME XI

Acidity in relation to bacterial changes induced by freezing. Abstract... 95
Action of ultraviolet light upon the antigenic property of *P. avicida*. Abstract... 107
Albus, W. R., The application of growth curves to a study of the bacteriology of cheese. Abstract... 97
——, and Holm, George E. The effect of surface tension upon the growth of *Lactobacillus acidophilus* and *Lactobacillus bulgaricus*. Abstract... 83
Ammonia, The magnitude of the error due to, and its salts in the Van Slyke amino nitrogen procedure as commonly applied in studies of bacterial metabolism... 165
Anaerobe, *Clostridium flabelliferum:* a putrefactive, with brush-like sporangia... 37
Anaerobes, The blood-agar plate for spore-forming... 305
Anaerobes, The reduction of selenium compounds by sporulating... 407
Anaerobic organism, The production of catalase by an... 417
Anderson, J. Arlington. The urease content of nitrogen fixing bacteria. Abstract... 92
Application, The, of growth curves to a study of the bacteriology of cheese. Abstract... 97
Ascospore stage for the fungi of blastomycosis. The infective and taxonomic significance of a newly described. Studies in microbic heredity. VI... 229

Bacillus acidophilus, A study of, from the digestive tract of calves... 115
Bacteria, Cellobiose as an aid in the differentiation of the colon aerogenes group of... 359
——, The biogenetic law of Haeckel and the origin of heterogeneity within pure lines of. Studies in microbic heredity. V... 203
Bacterial growth, Surface tension and... 393
—— metabolism, The magnitude of the error due to ammonia and its salts in the Van Slyke amino nitrogen procedure as commonly applied in studies of... 165
—— metabolism, The possibilities of the conductivity method as applied to studies of... 177
Bacteriology, The, of chronic prostatitis and the localization in animals of organisms isolated. Abstract... 114
"Bacteriophage," A, active against a hemolytic streptococcus. Abstract. 89
Bacteriostasis, dye, Conditions and reactions defining... 345
Bacterium typhosum in ice cream, Viability of... 27
Baldwin, I. L. A possible explanation for the specificity of cross-inoculation groups in the legume family. Abstract... 93
Baltimore milk supply, Observations on "pin point colony" organisms in the. 285

Batchelor, H. W., Gibbs, W. M., and Sickels, T. N. Surface tension and bacterial growth..... 393
Beerman, Philip, and Kopeloff, Nicholas. The influence of *L. acidophilus* on the colon-aerogenes group in the intestine. Abstract..... 101
——, ——, and Lonergan, M. P. *L. acidophilus* in epilepsy. Abstract..... 101
Beginnings, The, of bacteriology in the middle west. Abstract..... 86
Belding, David L., and Scudder, Sara A. Cladothrix isolated from the genito-urinary tract. Abstract..... 102
Biogenetic law, The, of Haeckel and the origin of heterogeneity within pure lines of bacteria. Studies in microbic heredity. V..... 203
Biologic, The, origin of inagglutinability with freshly isolated typhoid cultures. Abstract..... 84
Birge, E. A., and Trealease, William. The beginnings of bacteriology in the middle west. Abstract..... 86
Birkhaug, Konrad E. Toxin production of the *Streptococcus erysipelatis*. Abstract..... 112
Blastomycosis, The infective and taxonomic significance of a newly described ascospore stage for the fungi of. Studies in microbic heredity. VI..... 229
—— hominis, Observations on the genetic origin of the several types of fungi found in the lesions of. Studies in microbic heredity. VII..... 419
Blood, The, -agar plate for spore-forming anaerobes..... 305
Brannon, J. M., and Prucha, M. J. Viability of *Bacterium typhosum* in ice cream..... 27
Breed, Robert S., and Breed, Margaret E. *Serratia indica* Bergey, the red chromogenic bacterium originally isolated by Koch in India. Abstract. 76
Broadhurst, Jean, and Gilpin, Laura. Acidity in relation to bacterial changes induced by freezing. Abstract..... 95
——, ——, and Johanson, E. Yeast as a substitute for meat extract in culture media. Abstract..... 87
Brown, J. Howard, Frost, W. D., and Shaw, Myrtle. Hemolytic streptococci of the Beta type in certified milk. Abstract..... 110
Burke, G. W., Levine, Max, and Watkins, J. H. Oxidation of sugar on trickling filters. Abstract..... 94
——, ——, and ——. Some observations on the purification of creamery wastes. Abstract..... 94
Bushnell, L. D. Action of ultraviolet light upon the antigenic property of *P. avicida*. Abstract..... 107

C. flabelliferum, Further isolations of *Clostridium flabelliferum* with a comparison of the nitrogen metabolism of several strains of, and *C. sporogenes*..... 189
C. sporogenes, Further isolations of *Clostridium flabelliferum* with a comparison of the nitrogen metabolism of several strains of *C. flabelliferum* and..... 189
Calves, A study of *Bacillus acidophilus* from the digestive tract of..... 115
——, A study of enterococci from the digestive tract of..... 129
Carbon dioxide requirements of bacteria. Abstract..... 78

Carpenter, Charles M. Notes on the bacteriology of two cases of undulant fever in man. Abstract 108
Catalase, The production of, by an anaerobic organism 417
Cellobiose as an aid in the differentiation of colon aerogenes group of bacteria 359
Changes in intestinal flora of rats on a calcium deficient diet. Abstract ... 100
Cladothrix isolated from the genito-urinary tract. Abstract 102
Clark, Paul F., and Clark, Alice Schiedt. A "bacteriophage" active against a hemolytic streptococcus Abstract 89
Clark, W. Mansfield, Cohen, Barnett, and Gibbs, H. D. The significance of recent studies on meriquinones. Abstract 81
Clostridium flabelliferum: A putrefactive anaerobe with brush-like sporangia. 37
——, further isolations of, with a comparison of the nitrogen metabolism of several strains of *C. flabelliferum* and *C. sporogenes* 189
Cohen, Barnett, Clark, W. Mansfield, and Gibbs, H.D. The significance of recent studies on meriquinones. Abstract 81
Colley, Mary Wotherspoon. Measuring the growth of bacteria with the nephelometer. Abstract 91
Colon-aerogenes group, Further observations on utilization of the salts of organic acids by the 409
—— group of bacteria. Cellobiose as an aid in the differentiation of the 359
Conditions and reactions defining dye bacteriostasis 345
Conductivity as applied to studies of bacterial metabolism. II. Parallelism between ammonia and conductivity in nutrient gelatine cultures of putrefactive anaerobes. Abstract 82
—— method, The possibilities of the, as applied to studies of bacterial metabolism 177
Conn, H. J. A group of non-spore-forming soil bacteria of peculiar morphology. Abstract 92
Contribution, A, to the dynamics of toxicity and the theory of disinfection .. 1
Crowell, Minot J. Morphological and physiological variations in the descendants of a single diphtheria bacillus 65
Crystal formation in bacterial cultures. Abstract 90

Dack, Gail M., and Mills, Ralph G. The fate of *Bact. typhosum* and other organisms in a segregated vein and in the general circulation of the normal and immunized rabbit. Abstract 107
Damon, Samuel Reed. A note on the spirochaetes of termites 31
Data bearing on the question of the size of the antibody molecule and amount of antibody substance present in an immune serum. Abstract .. 105
Davis, D. J. Mutation-like alterations of certain pathogenic fungi. Abstract 90
Dehler, Sophie A., and Havens, Leon C. The use of glycerin in brilliant green bile for the isolation of *B. typhosus* from feces. Abstract 104
Demeter, Karl J. Some facts about *Streptococcus lactis* and the litmus milk reaction. Abstract 97
Destructive, The, action of certain bacteria on the virus of tobacco mosaic. Abstract 98

Devereux, Edward D., Tanner, Fred W., and Higgins, Francis M. The multiplication of yeasts and yeast-like fungi in synthetic nutrient solutions..... 45
Differential media, The use of potassium tellurite in..... 141
tests and their relation to habitat of the coli-aerogenes group. Abstract 77
Diphtheria bacillus, Morphological and physiological variations in the descendants of a..... 65
Disinfection, A contribution to the dynamics of toxicity and the theory of. 1
Distribution, The, of fusiform bacilli and spirochetes in tissue. Abstract.. 114
Domogalla, B. P. Seasonal variations in the ammonia and nitrate content of lake waters and their relation to certain types of bacteria. Abstract 93
Douglas, W. F., and Parsons, L. B. The influence of sodium chloride on the colorimetric determination of pH. Abstract..... 80
Downs, Cornelia M., and Goodner, Kenneth. The effect of certain substances on the precipitin reaction. Abstract..... 106
Dutton, L. O. The rôle of the bacteriophage in streptococcus infections. Abstract..... 89
Dye bacteriostasis, Conditions and reactions defining..... 345

Effect, The, of certain substances on the precipitin reaction. Abstract.... 106
——, The, of sodium benzoate upon certain yeasts. Abstract..... 99
——, The, of surface tension upon the growth of *Lactobacillus acidophilus* and *Lactobacillus bulgaricus*. Abstract..... 83
Electrophoretic, The, migration of various types of vegetable cells..... 367
—— potentials; the virulence and agglutinability of pneumococci. Abstract 85
Enterococci, A study of, from the digestive tract of calves..... 129
Evans, Alice C., and Freeman, Walter. Studies on the streptococcus of epidemic encephalitis. Abstract..... 110
Example, An, of bacterial mutation. Abstract..... 89
Experimental *Bacillus pyocaneus* keratitis. Abstract..... 102
——, An, study of the organisms concerned in the commercial production of acetone and butyl alcohol by the biological method. Abstract..... 91
Experiments on the solubility of pneumococci in bile and in sodium oleate solutions. Abstract..... 106

Falk, I. S., and Harrison, R. W. The influence of hydrogen ion concentration upon the viscosity of bacterial suspensions. Abstract..... 85
——, and Jacobson, M. A. Electrophoretic potentials; the virulence and agglutinability of pneumococci. Abstract..... 85
——, and ——. Some relations between the electrophoretic potential and other characteristics of variants of pneumococci. Abstract..... 83
——, and Winslow, C.-E. A. A contribution to the dynamics of toxicity and the theory of disinfection..... 1
——, and Yang, S. Y. Experiments on the solubility of pneumococci in bile and in sodium oleate solutions. Abstract..... 106
Fate, The, of *Bact. typhosum* and other organisms in a segregated vein and in the general circulation of the normal and immunized rabbit. Abstract 107

Fay, A. C. Thermotolerant saccharophilic organisms as a cause of "pin point" colonies in the bacteriological analysis of ice cream. Abstract. 96
Fermentation of citrates. Fermentation of citric acid in various culture media. Abstract 77
Frazier, W. C. A new method for the detection of proteolysis by bacteria. Abstract 80
Fred, E. B., Peterson, W. H., and Mulvania, Maurice. The effect of lactic acid bacteria on the acetone-butyl alcohol fermentation 323
Freeman, Walter, and Evans, Alice C. Studies on the streptococcus of epidemic encephalitis. Abstract 110
Frost, W. D., Brown, J. Howard, and Shaw, Myrtle. Hemolytic streptococci of the Beta type in certified milk. Abstract 110
Fungi, The multiplication of yeasts and yeast-like, in synthetic nutrient solutions 45
——, Observations on the genetic origin of the several types of, found in the lesions of blastomycosis hominis. Studies in microbic heredity. VII.. 419
—— of blastomycosis, The infective and taxonomic significance of a newly described ascospore stage for the. Studies in microbic heredity. VI.. 229
Further isolations of *Clostridium flabelliferum* with a comparison of the nitrogen metabolism of several strains of *C. flabelliferum* and *C. sporogenes* 189
—— observations on utilization of the salts of organic acids by the colon-aerogenes group 409
—— studies on the poliomyelitis precipitin reaction. Abstract 111

Galt, R. H., and Koser, S. A. The oxalic acid test for indol 293
Generalized torula infection in man. Abstract 109
Genetic, A, inquiry into the reason for three diverse morphologic types of infecting fungi in blastomycosis hominis. Abstract 90
—— origin, Observations on the, of the several types of fungi found in the lesions of blastomycosis hominis. Studies in microbic heredity. VII. 419
Gibbs, W. M., Batchelor, H. W., and Sickels, T. N. Surface tension and bacterial growth 393
——, Clark, W. Mansfield, and Cohen, Barnett. The significance of recent studies on meriquinones. Abstract 81
Gilbert, Ruth, and Humphreys, E. M. The use of potassium tellurite in differential media 141
Gilpin, Laura, and Broadhurst, Jean. Acidity in relation to bacterial changes induced by freezing. Abstract 95
Goodner, Kenneth, and Downs, Cornelia M. The effect of certain substances on the precipitin reaction. Abstract 106
Green, R. G., and Halvorson, H. O. Studies on the etiology of distemper in foxes. Abstract 100
Group, A, of non-spore-forming soil bacteria of peculiar morphology. Abstract 92

Haeckel, The biogenetic law of, and the origin of heterogeneity within pure lines of bacteria. Studies in microbic heredity. V 203

Hall, Ivan C. Some fallacious tendencies in bacteriologic taxonomy. Abstract 75
——, The reduction of selenium compounds by sporulating anaerobes 407
Halvorson, H. O., and Green, R. G. Studies on the etiology of distemper in foxes. Abstract 100
Harding, H. G., and Tanner, F. W. Thermophilic bacteria from milk. Abstract 96
——, and Ward, A. R. Thermophilic bacteria and milk pasteurization. Abstract 95
——, and ——. Variation of temperatures within bacteriological incubators. Abstract 91
Harris, Norman MacL. Our society—in retrospect and prospect 153
Harrison, R. W., and Falk, I. S. The influence of hydrogen ion concentration upon the viscosity of bacterial suspensions. Abstract 85
Hartman, F. W., and Jackson, Edna. Experimental *Bacillus pyocaneus* keratitis. Abstract 102
Hastings, E. G., Mansfield, Harriet, and Helz, George. Fermentation of citrates. Fermentation of citric acid in various culture media. Abstract 77
Havens, Leon C., and Dehler, Sophie A. The use of glycerin in brilliant green bile for the isolation of *B. typhosus* from feces. Abstract 104
Helz, George, Hastings, E. G., and Mansfield, Harriet. Fermentation of citrates. Fermentation of citric acid in various culture media. Abstract 77
Hemolytic streptococci of the Beta type in certified milk. Abstract 110
Heterogeneity within pure lines of bacteria, The biogenetic law of Haeckel and the origin of. Studies in microbic heredity. V 203
Higgins, Francis M., Tanner, Fred W., and Devereux, Edward D. The multiplication of yeasts and yeast-like fungi in synthetic nutrient solutions. 45

——, and Reddish, George F. *Clostridium flabelliferum:* A putrefactive anaerobe with brush-like sporangia..... 37
Sugar as a source of anaerobes causing explosion of chocolate candies. Abstract..... 100
Sunlight as a disinfectant. Abstract..... 82
Surface tension and bacterial growth..... 393
Swenarton, Joseph Charles. Observations on "pin point colony" organisms in the Baltimore milk supply..... 285
Synthetic nutrient solutions, The multiplication of yeasts and yeast-like fungi in..... 45

Tanner, Fred W., Devereux, Edward D., and Higgins, Francis M. The multiplication of yeasts and yeast-like fungi in synthetic nutrient solutions..... 45

Tanner, Fred W., Devereaux, Edward D., and Harding, H. G. Thermophilic bacteria from milk. Abstract 96
——, and Strauch, Luella B. The effect of sodium benzoate upon certain yeasts. Abstract 99
Termites, A note on the spirochaetes of 31
Thermal resistance as affected by age and environment. Studies upon bacterial spores. I 253
Thermophilic bacteria and milk pasteurization. Abstract 95
—— —— from milk. Abstract 96
Thermotolerant saccharophilic organisms as a cause of "pin-point" colonies in the bacteriological analysis of ice cream. Abstract 96
Thompson, Luther. The blood agar plate for spore-forming anaerobes 305
Toxicity, A contribution to the dynamics of, and the theory of disinfection .. 1
Toxin production of *Streptococcus erysipelatis*. Abstract 112
Trealease, William, and Birge, E. A. The beginnings of bacteriology in the middle west. Abstract 86
Twenty-seventh Annual Meeting of the Society of American Bacteriologists. 75

Upton, M. F., and Winslow, C.-E. A. The electrophoretic migration of various types of vegetable cells 367
Urease, The, content of nitrogen fixing bacteria. Abstract 92
Use, The, of glycerin in brilliant green bile for the isolation of *B. typhosus* from feces. Abstract 104
Use, The, of potassium tellurite in differential media 141

Valley, George, and Rettger, Leo F. Carbon dioxide requirements of bacteria. Abstract 78
Van Slyke amino nitrogen procedure, The magnitude of the error due to ammonia and its salts in the, as commonly applied in studies of bacterial metabolism 165
Variation of temperatures within bacteriological incubators. Abstract 91
Vegetable cells, The electrophoretic migration of various types of 367
Viability of *Bacterium typhosum* in ice cream 27

Ward, A. R., and Harding, H. A. Thermophilic bacteria and milk pasteurization. Abstract 95
——, and ——. Variation of temperatures within bacteriological incubators. Abstract 91
Watkins, J. H., Burke, G. W., and Levine, Max. Some observations on the purification of creamery wastes. Abstract 94
